

Master Programme

Accreditation - On-Site Visit of ASIIN

ASIIN auditors and Tunisian project partners

As you have red in our previous newsletters, the German accreditation agency ASIIN was chosen to verify and certify our master programme innovation management. After the training with ASIIN experts in September 2013 and the four accreditation workshops from November 2013 to January 2014 the final version of the accreditation application was finished and submitted to ASIIN in March 2014. In June a two days on-site accreditation visit was organized to evaluate the environment,

students and teachers of the master programme that needs to be accredited. The accreditation team consisted of four external German auditors and one representative from ASIIN who attended the visit in Tunis. Based on a given agenda, the auditors

ASIIN auditors looking at master theses

talked to the teachers and students of the master programme, had a close look at some project studies and master theses and got an impression from the universities and our DICAMP library. Currently we are waiting for a detailed report of the visit but so far the impression from the auditors was positive. They already suggested some points within the programme that need to be improved by providing more detailed information which will be done until the end of August. We are looking forward to working on the discussed points in order to ensure the quality of the programme.

Project Activities

Preparation for DICAMP Final Event

Our project DICAMP is coming to an end on October 14th. Therefore we are currently preparing a final event and project workshop in Tunis, especially to raise the awareness for our master programme again in Tunisia particularly among the industry and to finalize the sustainability strategy. The final event will include a summer school with open lectures where first cohort students will teach the new generations about diverse innovation topics. Furthermore a graduation ceremony of the first cohort of students will be organized as well as an innovation conference supported by APII and companies (HP, PWC, Orange) who will

give awards for the best master thesis. We are planning to finish our summer school with an innovation workshop in a company in Tunis and a joint social farewell event with the Tunisian students and teachers. Regarding the DICAMP project last workshop will be conducted where the final report and finances will be discussed among all project partners.
